# Group Summary on Importance Ratings

## What does this "Group Summary on Importance Ratings" report show me?

This report shows the importance ratings by constituency groups that are large enough to report. Two raters or more are required per constituency group other than you and your boss. The importance ratings are listed in rank order of how all raters viewed importance of the skills from highest to lowest.

### A How do I interpret my data?

- Check for consistency across groups. Look at the highs and lows more than the numerical averages. Are your top third and bottom thirds the same, similar, or dissimilar across groups? Especially note those where there is an opposite opinion (one group has it as a high, and another as a low).
- Look for matched strengths, those high in importance and skill for you.
- Look for mismatches, those high in importance but a low skill for you.
- The best way to determine matches and mismatches is to look at the Skill-Importance Matrix.
- There may be other sources of information about importance. You could compare your ratings to existing competency, values or job models in your organization. You can also compare with your performance objectives and discuss with your boss (and/or other raters) to determine potential gaps.
- How much difference equals a disagreement? Generally, one point is a significant difference between groups. However, not all differences are the same. A group that rated importance as 5 is not really different from one that rated importance as 4. Both are high scores. Differences between 4 and 3 or 3 and 2, however, should be considered as meaningful differences.

### B Things to note:

- It is common for different groups to view importance differently. They see you through different lenses.
- Generally speaking, you should focus on the highest importance items as indicated by your boss. You'll want to address any key differences to ensure you are aligned accordingly for your performance goals.

### C What if you don't agree with the report findings?

- If you don't agree with your raters on importance, go to three people you trust and find out if the skills raters picked are really important for your success.
- Ask others to tell you about people who have been successful due to these skills, or about those who have floundered because they were weak in these.

# Group Summary on Importance Ratings

## Mary Crandall's Group Summary Average

The averages and the graph on the right represent your average ratings across all of the items in this report by each rating group. The average and square box on the first line represent the average from all raters other than you. The average and square box on the next line represent the average of your self ratings. The averages and square boxes on the remaining lines represent the averages from specific groups who rated you. This may include bosses, peers, direct reports, customers, and others.

All Others	4.47								
Self	4.32								
Boss	4.51								
Direct Reports	4.62								
Customers	4.08								

### 1.0 Customer Focus (15)

Skilled(To): Is dedicated to meeting the expectations and requirements of internal and external customers; gets first-hand customer information and uses it for improvements in products and services; acts with customers in mind; establishes and maintains effective relationships with customers and gains their trust and respect.

All Others	High	4.82 ▲							
Self		5.00							
Boss		5.00							
Direct Reports	High	5.00 ▲							
Customers	High	4.33 ▲							

### 3.0 Integrity and Trust (29)

Skilled(To): Is widely trusted; is seen as a direct, truthful individual; can present the unvarnished truth in an appropriate and helpful manner; keeps confidences; admits mistakes; doesn't misrepresent him/herself for personal gain.

All Others	High	4.73 ▲							
Self		4.00							
Boss		5.00							
Direct Reports	High	4.71							
Customers	High	4.67 ▲							

### 3.0 Organizing (39)

Skilled(To): Can marshal resources (people, funding, material, support) to get things done; can orchestrate multiple activities at once to accomplish a goal; uses resources effectively and efficiently; arranges information and files in a useful manner.

All Others	High	4.73 ▲							
Self		4.00							
Boss		5.00							
Direct Reports	High	4.71							
Customers	High	4.67 ▲							

### 3.0 Drive for Results (53)

Skilled(To): Can be counted on to exceed goals successfully; is constantly and consistently one of the top performers; very bottom-line oriented; steadfastly pushes self and others for results.

All Others	High	4.73 ▲							
Self		5.00							
Boss		5.00							
Direct Reports	High	4.86 ▲							
Customers	High	4.33 ▲

# EQ Report

## What does this "EQ Report" show me?

This report contains a special subset of the competencies most related to EQ (Emotional Quotient). The concept of EQ focuses on how well you manage yourself in relation to others and how effectively you interact with others.

### A Things to note:

- The report shows the average skill rating from all raters (excluding self) on all competencies rated as a reference point, then splits the results into EQ and non-EQ competencies. The non-EQ scale is made up of the 17 competencies that are least or not related to EQ. Examples would be Planning and Managing and Measuring Work.
- Each EQ competency is listed from highest to lowest in rank order.
- This particular report may have used fewer than the full set of competencies, so some of the EQ-related competencies may not be included.
- Low EQ results could mean trouble relating constructively with others.

### B Some background:

According to the research of Dan Goleman and others, these competencies can play a significant role in the quality with which you interact with, work through, manage and just basically relate to others.

### C The EQ factors as seen by Goleman are:

- "Self-awareness" - the ability to recognize and understand your moods, emotions and drives, as well as their effect on others - measured by self confidence, realistic self-assessment and a self-deprecating sense of humor.
- "Self-regulation" - the ability to control or redirect disruptive impulses and moods; the propensity to suspend judgment, to think before acting - measured by trustworthiness and integrity, comfort with ambiguity and openness to change.
- "Motivation" - a passion to work for reasons that go beyond money or status; a propensity to pursue goals with energy and persistence - measured by a strong drive to achieve, optimism, even in the face of failure, and organizational commitment.
- "Empathy" - the ability to understand the emotional makeup of other people; skill in treating people according to their emotional reactions - measured by expertise in building and retaining talent, cross-cultural sensitivity and service to clients and customers.
- "Social Skill" - proficiency in managing relationships and building networks; an ability to find common ground and build rapport - measured by effectiveness in leading change, persuasiveness and expertise in building and leading teams.

EQ Report

# The Skill - Importance Matrix

## What does this "Skill-Importance Matrix" report show me?

This report shows the comparison of your skill versus importance ratings as rated by all others.

Your skill and importance ratings were divided into thirds (highest third, middle third, lowest third). Skills are divided down the left-hand side of the matrix from lowest on the top and highest on the bottom. Importance is divided from left to right across the bottom of the matrix.

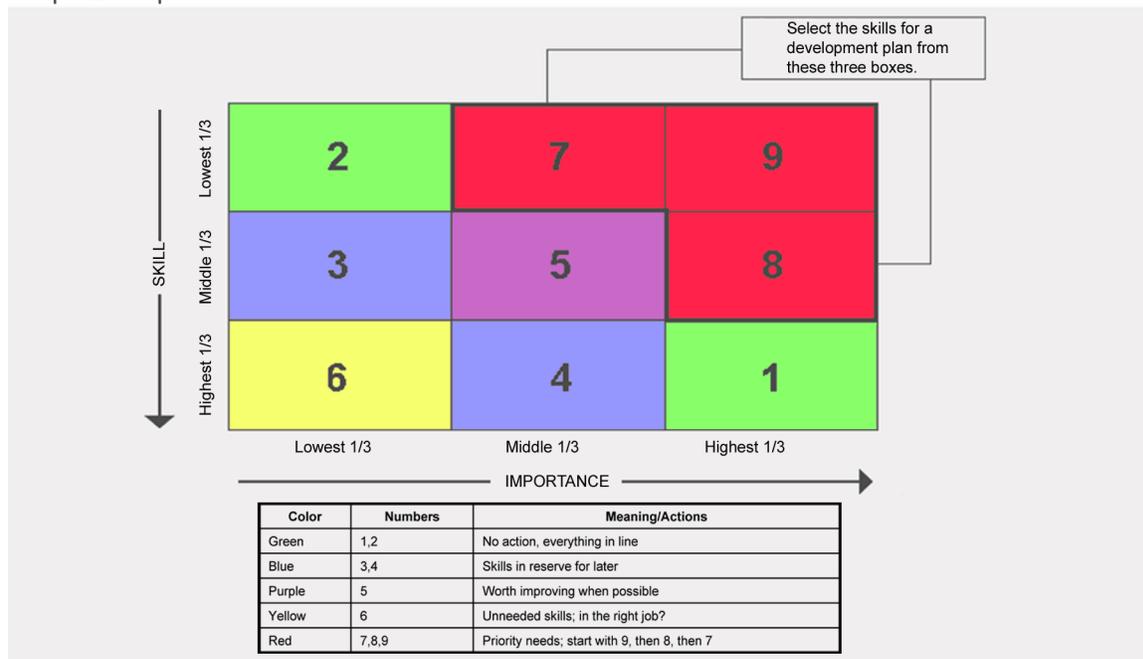

### A Things to note:

In an ideal world, all of your skills would be in three of the nine boxes - the green and purple boxes - meaning your actual skills are equally distributed in the same priority as they are important for success. Since none of us live in an ideal world, you will have skills listed in most if not all of the nine boxes.

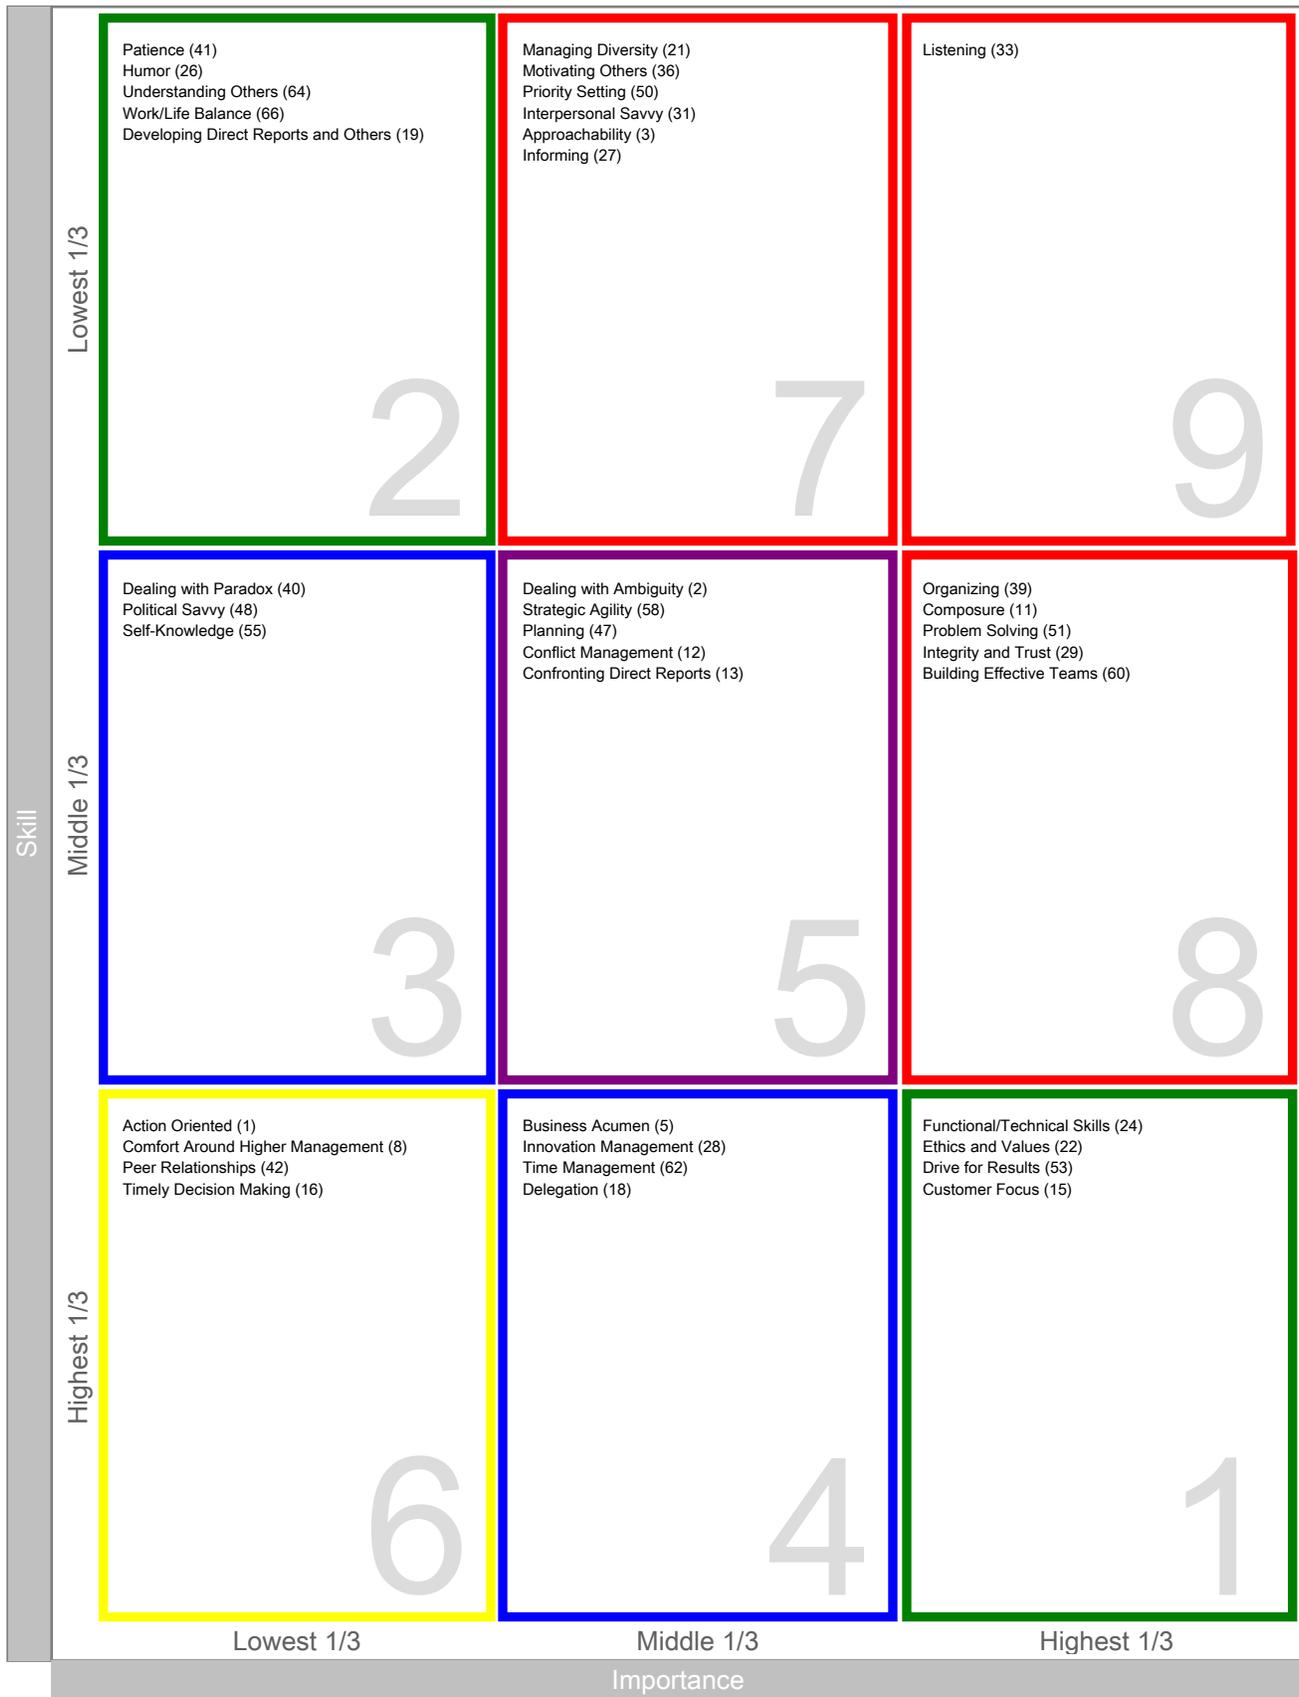

### B Your Report Map:

The numbers 1 - 9 appear in the nine boxes below. These indicate how likely it is that a listed skill is a need for you.

Graph Example:

# The Skill - Importance Matrix

The Skill - Importance Matrix

# Best Developmental Opportunities

## What does this "Best Developmental Opportunities" report show me?

This report will help you select one or more skills to work on or develop. The needs are listed in order of the number of your groups (boss or bosses, peers, direct reports and customers), which have identified a significant gap between importance of the skill and your actual skill level.

Potential needs that all groups indicated as gaps are listed first, in order of the size of the overall gap between importance and skill ratings. Then skills identified by fewer than all of your groups are listed next in order of the size of the skill gap.

### A What would cause these items to show on this report?

- The software has reviewed your results and looked for cases where the skill/SKL was rated as highly important/IMP for your success, but your personal skill/SKL rating was low.
- The percentile gap between importance and your current skill indicates possible gaps.

### B Things to note:

- Best Developmental Opportunities are computed by looking at gaps between how important a competency is and how skilled the person is according to rater groups. Gaps are figured by percentile differences between importance and skill. The three to five largest gaps are listed in the order of how many groups identified these gaps. At least one need is always listed from the boss, as the boss is generally the most accurate rater in research.
- This report uses percentile differences among groups. A percentile can best be thought of as where a score falls on a 100-point scale. The numbers indicate where a score falls against the distribution of scores by that person's raters. The 50th percentile is average - about half the scores fall above and below this point. The 75th percentile is generally accepted as the breakpoint for a high score (and the 25th a low score). The 85th and the 15th percentiles are generally considered the threshold for very high and low scores, and the 95th and 5th the extremes of the two. For example, when you read that Planning is at the 90th percentile of importance, this means that it is considered highly important, and only 10% of the scores are above it.
- This report also displays both the unskilled (the "before" picture of you) and the skilled (what you need to work toward) text for each skill. (Unskilled and skilled definitions appear for competencies; custom items may not include both).

### C What if you don't agree with the report findings?

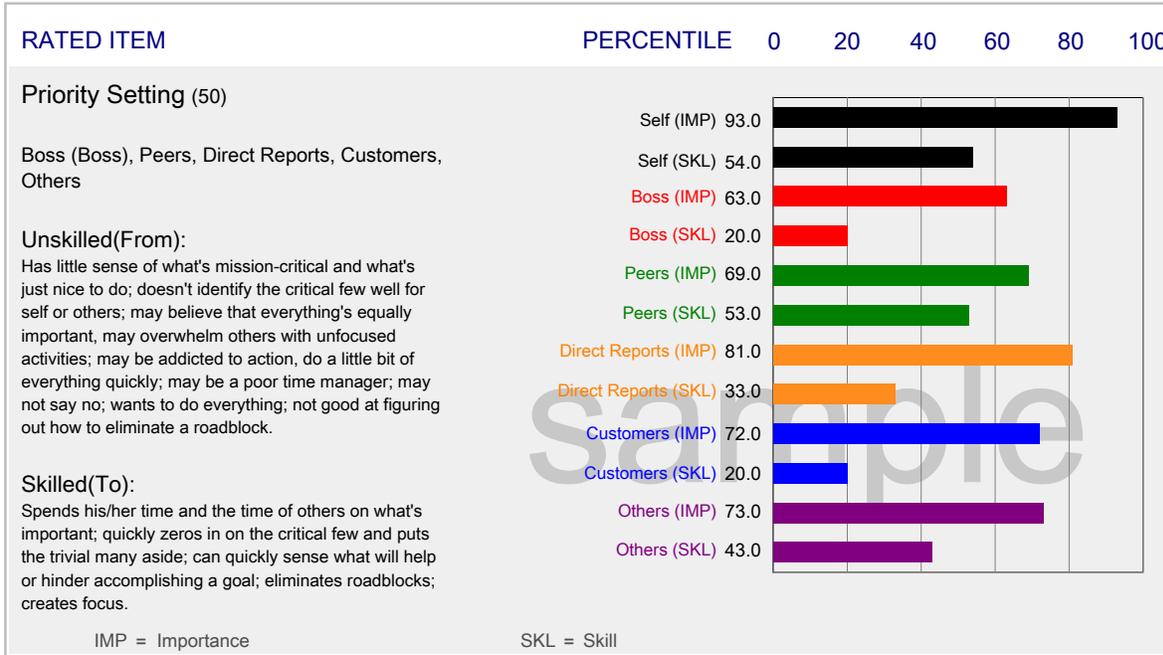

- This software doesn't know your situation.
- Not all of the unskilled or skilled text will be relevant for you.
- If some or all of those needs don't make any sense to you, feel free to go back into the report and select the ones that do.
- Use this report as a starting point to target needs for your development plan. Check with sources close to you to confirm if these are your most pressing needs.

See example graph on next page.

# Scoring Distribution Summary

## What do these "Scoring Distribution Summary" reports show me?

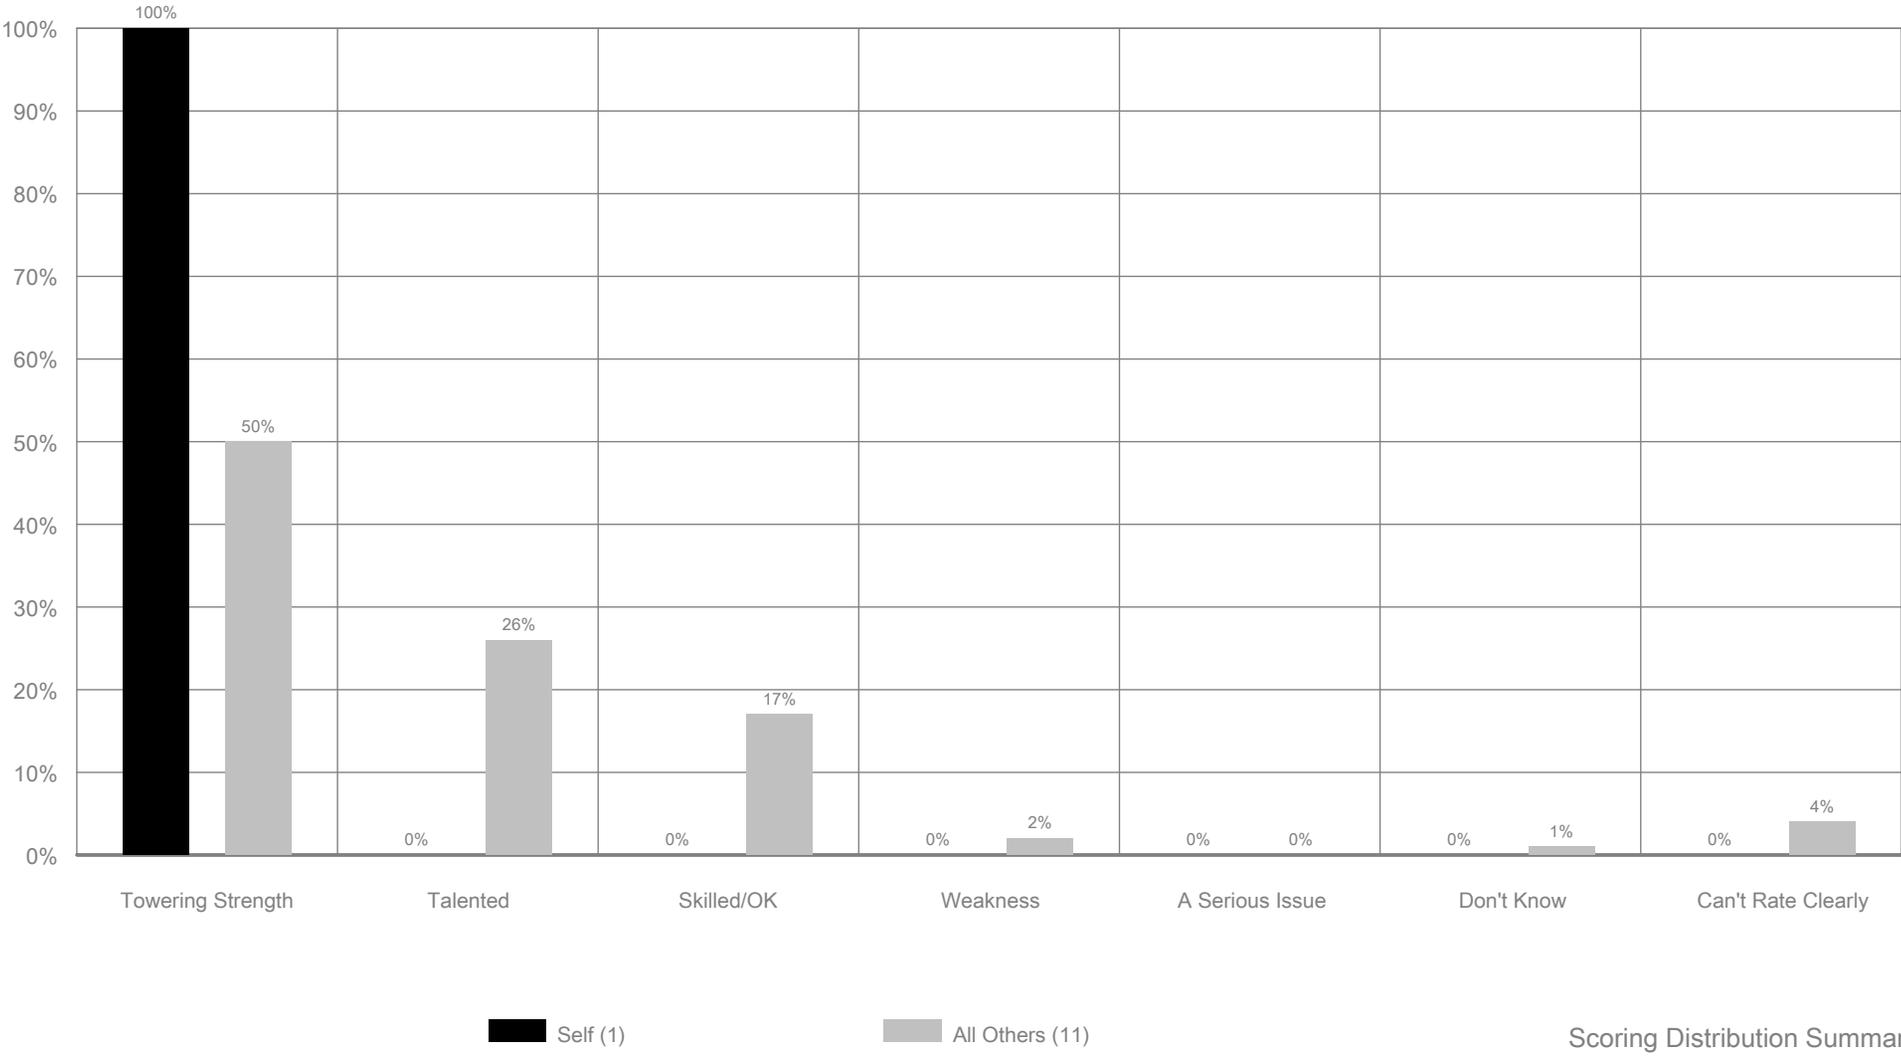

There are two graphs for each question - if you have both the skill and importance questions, you will have four graphs to review.

The Skill Rating Distribution graph and Importance Rating Distribution graph show the percentage of responses given by you and all other raters for each possible response. It is intended to give you a general idea of the distribution of ratings you and others used.

The Skill Rating Distribution by Group and Importance Rating Distribution by Group show the same information broken down by each constituency group that rated you. Remember that different constituencies sometimes use the five-point scale differently. A group using higher or lower ratings/scores within the scale points may or may not be meaningful. It may or may not reflect their general appraisal of your skills.

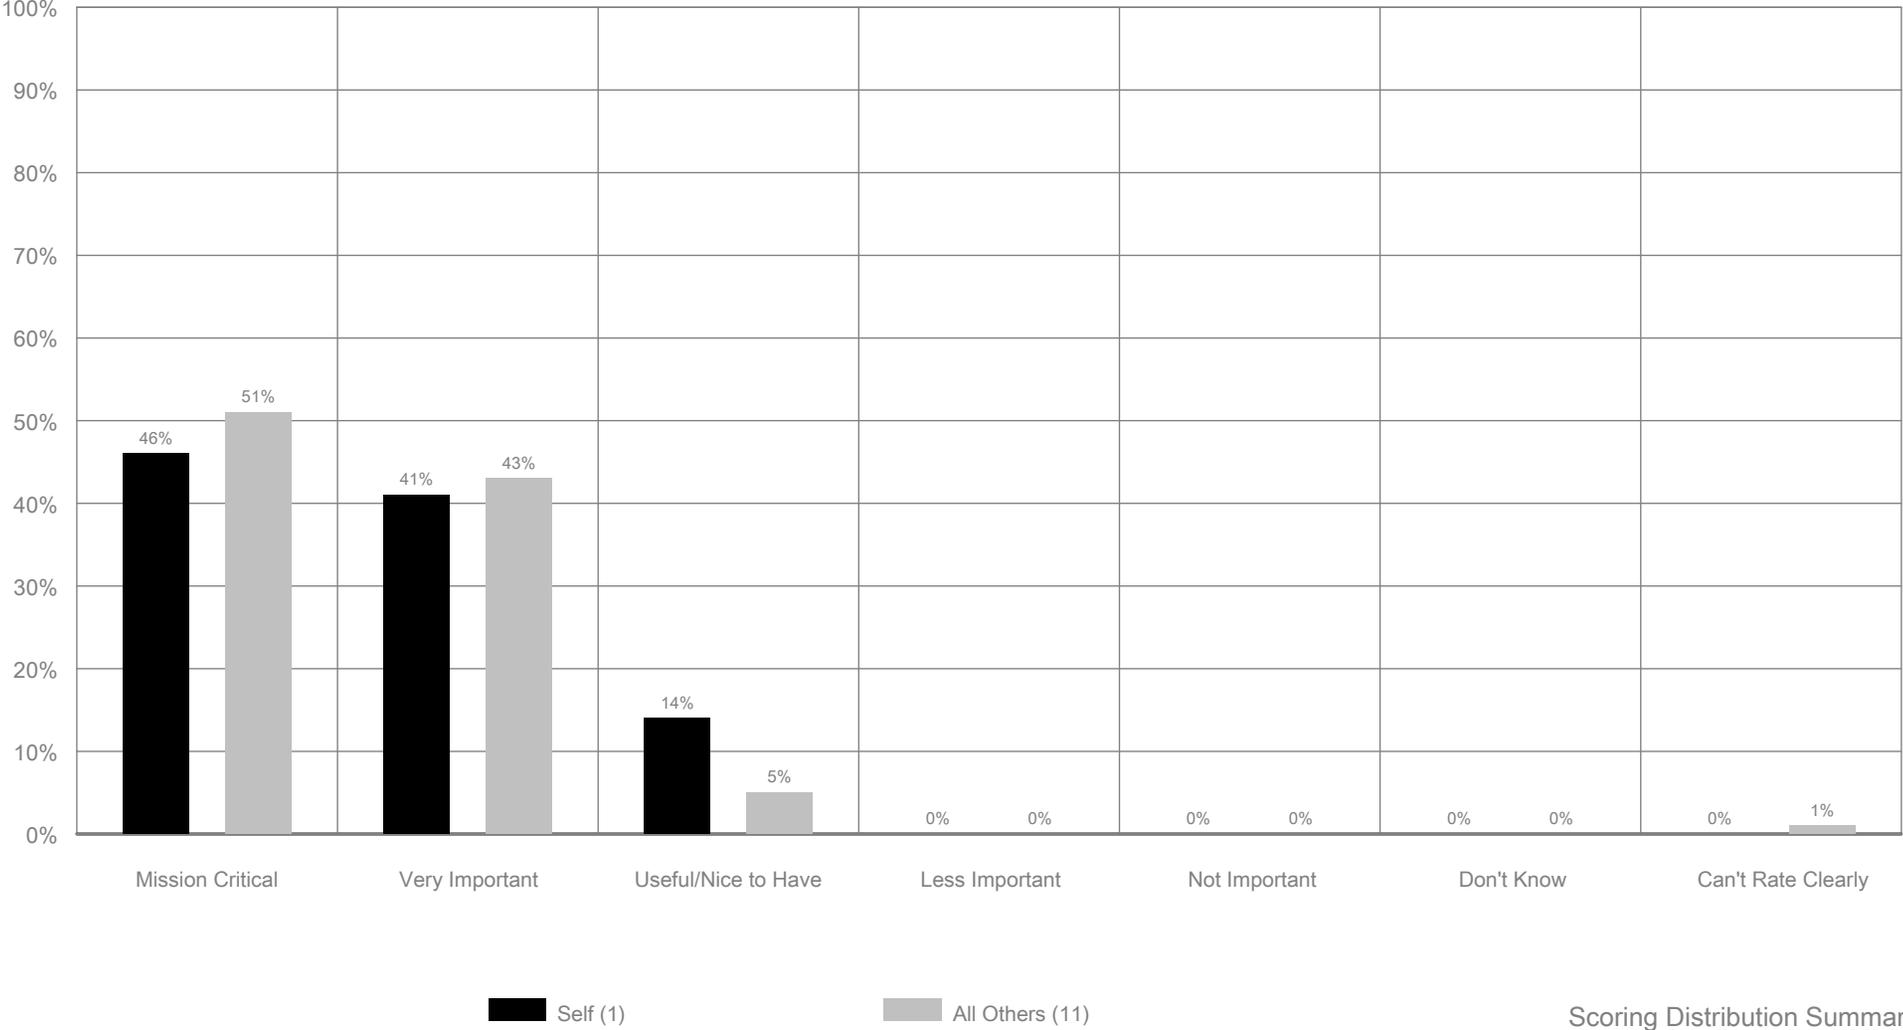

Note: The normative response percentage breakdowns are available at the beginning of this report.

# Comments by Raters - Competencies

## What does this "Comments by Raters" - Competencies report show me?

This report lists the comments offered by you and your raters. The notes are listed by competency. General notes - those not tied to a specific competency - are listed last.

### A What would cause these items to show on this report?

Some raters will take the time to try to help you understand your report by typing in their thoughts about you, your strengths and weaknesses, and what they think you ought to do to improve. If an item is not here it was either not included in your survey or no one offered a comment on it.

### B Things to note:

- Look for themes and similar statements ("He/she doesn't listen to others in meetings"). Similar or repeated statements have a higher probability of being true.
- Be careful of "against the weight of opinion" notes. It's always possible that six raters think you have interpersonal problems and the seventh, who you get along with really well, may write, "Best interpersonal skills I've ever seen." If you look at it from that rater's perspective, that statement would appear to be true even though the other six raters disagree.
- You behave differently with different people.
- Don't let one positive note talk you out of accepting responsibility for one of your needs.
- Your raters are taking a risk when they include notes. Many wonder how you will "take" them. Will you see the note in the constructive light in which it was intended or will you be defensive or blame-finding - trying to figure out who wrote each negative note?

### C What if you don't agree with the report findings?

- Compare the notes to your narrative report (if included). The positive notes should look like your effective behaviors, and the negative notes like your ineffective behaviors.
- It's best to look at the notes as a general message.
- Try some of the suggestions offered by your raters to determine if a new tactic might make you more effective.

## Comments by Raters - Competencies

### Dealing with Ambiguity (2)

Mary is very good at withholding action until she has gathered information from all involved parties

### Customer Focus (15)

Mary is savvy enough to recognize when patients have inappropriate expectations of our agency. She is able to discern when expectations are realistic and we should meet them, and when the client or family is being unreasonable and needs to understand what we can and cannot do. I also appreciate how she supports her staff in her customer communications

### Delegation (18)

I would prefer more frequent direction re:my participation in current projects. Mary has so many ideas and concurrent initiatives that some seem to "fall by the wayside" because of competing priorities. Mary knows instantly the status of all of her projects, but sometimes changed priorities and status of each project's importance doesn't trickle down to me as fast as I would like.

### Developing Direct Reports and Others (19)

Mary tries hard to bring the best out of her people, willing to give many chances for people to succeed, but able to reach her limit and cut her losses when it becomes apparent an employee is not able to perform.

### Functional/Technical Skills (24)

Mary is helping us all become more Data driven!

### Interpersonal Savvy (31)

Mary is very authentic. She is a modest, yet effective leader who treats fellow employees as equals, unless the situation demands something else.

### Listening (33)

Mary is incredibly approachable and always open to hearing what I have to say. I never feel "shortchanged" in our communications

### Motivating Others (36)

Mary is very good at helping the entire organization know what "success" looks like and help us concentrate on the positive and minimize the negative. Everyone knows what our goals are.

### Peer Relationships (42)

I really appreciate how authentic and candid Mary is. We are a very mature leadership group and Mary has fostered a high level of trust. I feel confident in "where I stand" with Mary at all times.

### Political Savvy (48)

Not necessarily deliberately misrepresenting, but fluid situations cause there to be conflicting versions of each situation. Mary is NOT perceived to be manipulative or scheming, only astute and flexible as situations require.

## Comments by Raters - Competencies

### Building Effective Teams (60)

Sometimes Mary gives credit to the whole team when in fact one or two team members are responsible for the great outcome. I hope she is giving those individuals private praise and letting them know that she knows how much work they've done to acheive the great outcome

### Time Management (62)

I don't know how she does it!
