Hello there,
I just wanted to drop you a line and share that I remain impressed with how well you coordinate all of the various aspects of the living donor program. Thank you for all that you do for our patients and this program.

Thank you all for attending the meeting this afternoon/evening and for your participation. I think it is quite obvious, just from our attendance level alone, that we are all committed to doing what is best for our patients, in this case our living kidney donors. I appreciate your support and engagement in this process. Thanks go specifically to Jason and Emily for pulling together the data that we were able to use as well. Hopefully we can wrap this up into somewhat of a more concrete "position" in the near future.
Thanks again,
Anita

Subject: Ethics Committee discussion regarding "young" non-directed donors

As we discovered when I brought an 18 y.o. potential altruistic donor to selection conference several weeks ago, members of our group have differing opinions about the appropriateness of someone this "young" being an altruistic donor. It was determined that perhaps an ethics consult might be worthwhile and the ethics committee has agreed that this is a subject matter they wish to have brought forward for further discussion.

We are on the Ethics committee meeting agenda for January 21st at 4:00 pm in the Pediatric Conference Room, 3rd Floor, OMS. Please attend if you are able. If you are unable to come and have thoughts you would like represented on your behalf, please send them my way. I have forwarded the attached articles to the Ethics Committee for their review prior to the meeting. You might find them helpful as well.

The purpose of this discussion is to have a review of our practice, as well as the practice of several other transplant centers, pertaining to altruistic donors. One goal is to help us avoid making "arbitrary" decisions, but to instead make thoughtful ones.

Thanks,
Anita
