Thank you Brian. Wow, that is embarrassing.

Joel

Subject: Dynamap Machines

Joel. I currently have 4 old Welch-Allen machines that clinical engineering no longer supports. I have three of the attached blue machines, two of which are currently downstairs being worked on because the battery no longer holds a charge. You can see the physical condition of the machine in the picture.

I know that the unit has not purchased new machines in at least three years. At a minimum, I would like to purchase 4 machines to replace the Welch-Allens, and optimally would like to replace the three GE as well given the time they spend downstairs. Please let me know if you have any questions or if I can provide any further information. Thanks. Brian
