**Subject:** Dynamaps

Good morning John,

I understand capital is due Friday and wanted to check in with you regarding the Dynamaps on the Acute Care units. 5 West has 4 machines that are dated and need to be replaced (see attachment). There are also 12 more dynamaps that need to be replaced/fixd throughout Acute Care. I understand that we can send them to you for repair, but we need to backfill the Dynamaps so as not to disrupt our workflows in providing patient care.

What is your recommendation at this point? I am happy to submit a capital request if I can get a quote from you. Thank you for your help!

Joel
